01 · OUR COMPANY

A pure technology company, founded in Oman.

Nadine Technologies is a technology company founded in Oman, with operations in South Africa, Kenya and Zambia, serving clients around the world. We design, build and run the technology that businesses depend on — from artificial intelligence, software and operating systems to custom-built phones, security devices and the cloud servers they run on. Our work is no longer just hosting: we build complete technology solutions, and we are now stepping into robotics.

AI Chatbots

Smart assistants that answer customers 24/7 on websites and apps.

Robotics COMING SOON

We are starting to design and build our own robots.

Apps & Software

Android apps, business systems, dashboards and websites.

Operating Systems & Phones

Our own custom operating systems and custom-built phones.

Security & Defence

Security devices and military technology for authorised agencies.

Cloud & Payments

Hosting, domains, business email, secure storage and payments.

02 · OUR VALUES

What we stand for

Innovation

We keep learning and building new things — AI, robotics and smarter software — so our clients stay ahead.

Security & Privacy

Client data is protected with encryption, strong logins and regular, encrypted off-site backups.

Reliability

We monitor the systems we run around the clock and fix problems before customers notice them.

Transparency

Clear prices in Kwacha, honest advice and plain-language explanations — no hidden charges.

Local First

Built for the markets we serve: local payments like mobile money, local support and fair, affordable pricing.

Our vision

To become a leading global technology company — designing and building artificial intelligence, robotics, devices and software for the markets we serve.

Our services

Custom Operating Systems NEW

Our own operating systems, built and secured for phones, devices and businesses.

Custom-Built Phones NEW

Phones built to order, running our own secure software.

Security Devices

CCTV, alarms, access control and trackers that connect to your phone.

Defence & Military Technology

Military equipment and technology for authorised government and security agencies.

AI Chatbots

Custom chatbots trained on your business: answer questions, take orders and bookings, and hand over to staff.

Robotics NEW

Our own robots, now in development — starting with practical robots for businesses and learning.

Mobile Apps

Android apps published on Google Play, with updates delivered straight to the phone.

Business Systems

Stock, sales, patient records, logistics and staff systems with admin dashboards.

Websites & Domains

Professional websites, .com and .zm domains, SSL certificates and DNS.

Cloud Hosting & Email

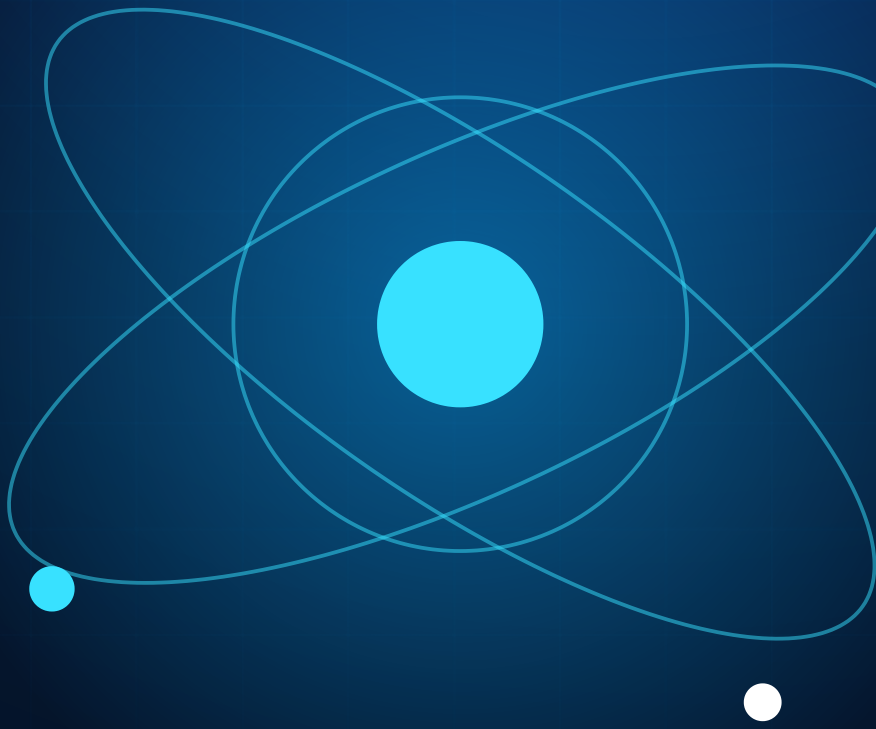

Fast hosting, databases and business email through Nadine Cloud.

Nadine Vault

Secure cloud storage app for photos and files — 2 GB free.

Nadine Pay

Mobile money payments (Airtel, MTN, Zamtel) and payment links for invoices.

04 · MISSION

Our mission

To make world-class technology affordable and easy for every business — by building smart, secure and reliable AI, software and cloud solutions, and by growing local talent in software engineering and robotics.

- Bring AI to everyday business — not just big companies.
- Design and build our own robots, phones and hardware.
- Keep every client's data safe, private and backed up.
- Price our services fairly, in Kwacha, with mobile money.

05 · OUR CLIENTELE

Who we work with

- Small and medium-sized businesses (SMEs)
- Pharmacies, clinics and optical practices
- Logistics, courier and shipping companies
- Tourism lodges and safari operators
- Retail shops and online sellers
- Churches, schools and non-profit organisations
- Members of the public (Nadine Vault)

Work we have delivered

Pharmacy app

An installable app for stock, sales and reports for a pharmacy.

Clinic records system

Patient records, payments and staff PINs for an optical clinic, with nightly encrypted backups.

Logistics admin system

Shipments, clients and accounting for a shipping company, with an in-app mailbox.

Shop & booking apps

Customer apps, websites and hosting for retail and tourism businesses.

06 · WHY CHOOSE US

One partner for all your technology

Everything in one place

AI, apps, websites, hosting, email and payments — one team, one bill.

Secure by design

Encryption, Cloudflare protection and encrypted off-site backups.

Always improving

Apps update themselves — no reinstalling. New features arrive automatically.

Local payments

Pay in Kwacha with Airtel, MTN or Zamtel mobile money through Nadine Pay.

24/7 monitoring

Our own monitoring watches your systems day and night.

Real support

Email support@nadinecloud.com and a real person replies.

07 · OUR TEAM

Our team

Our team is made up of software developers, designers and support staff with experience in AI, mobile apps, operating systems, phone and device engineering, business systems, cloud servers and cyber security. We work closely with every client to understand their business and build technology that actually fits it.

We are now growing a robotics and AI research team — combining software, electronics and engineering — to design and build our own robots.

08 · CONTACT INFORMATION

Let's build your next idea.
